- [Evaluation Interpack](#)
- [The new PREMIUM](#)
- [The renewed "SWITCH+"](#)
- [Summer maintenance](#)
- [Ducklings for the underprivileged](#)

Dear reader,

Hopefully you found the time to visit the Interpack fair in Düsseldorf in May. It was definitely worth it! Our Power tunnels were top notch. The new PREMIUM flaking machine had a lot of success. And the renewed SWITCH + enrobing machine also attracted a lot of attention. But also our spinners, our tempering machines, ... there was a lot to see at the Prefamac booth. Andhave you already considered a summer maintenance for your small and large machines? Do not postpone is the message! Finally, we take a look at coloured and tennis playing ducklings. Much reading and viewing pleasure!

Myriam Schepers
Managing Director

Newsletter 62 : Many thanks
for your Interpack visit

18/06/2014

Many thanks for your Interpack visit !

Those who were present at Interpack some weeks ago, will immediately recognize our booth: brown walls, brown floor, brown chocolate, but also white chocolate, green chocolate and verry green chocolate. The power cooling tunnel with belt width 1600 mm at the front was to show all possible options: complete covers with gas springs for easy cleaning, half covers according to the gulf wing principle to have a better reach at both sides. But also the Power plus with option bottom plates was shown. When cleaning becomes even more important, the Power Slim (820 mm at the fair) is most appropriate where both upper carpet belt and returning belt move under the covers. Should you wish to receive our newest leaflets so that you can see the different cooling principles, also of the Light cooling tunnel, then please just send an e-mail to myriam.schepers@prefamac.com

Click on more photos to see our Power, Power Slim, Power Plus and the Light Plexi, but also the green-greener-greenest chocolate in the 3in1 compact.

PREMIUM flakes

Finally a picture of the newest PREMIUM flaking machine. It had to stay a first until the fair. More than 500 kg of chocolate blocks were flaked under the eye of many spectators. And yes, in less than 2 minutes it is possible to Flake an entire block of 5 kg. Suuuuper fast, but also a suuuuper nice result. Different blades can be obtained, to have different results. The youtube video's <http://youtu.be/qd1B7Gth4C> and <http://youtu.be/Rnp6S-NiqKk> already give a few nice examples. Industrial versions with a conveyor belt and cooling are also available. Furthermore the corresponding biblio heating cabinet, to easily preheat chocolate blocks, was used and shown

Click on more photos to admire the PREMIUM end results, and also the biblio heating cabinet.

Super design for the SWITCH+

Switching chocolate in a flexible way is top notch, so that is why the SWITCH enrobing machine was only getting more and more important at Prefamac. Both the big chocolate bath (stock tray) as well as the small bottom / feet tray can be taken out of the machine. For each type of chocolate, another tray can be purchased: separately

for real and compound chocolate, separately for milk and white chocolate or one to work with and one to clean. For the fair, we presented the newest design of the machine. Brand and type of PLC correspond with the customer's wishes. Of course, manual control panels are also still available!

Click on more photos where we will show you some more details of our enrobing machines.

Summer maintenance

This year we will not be planning our maintenance two weeks before Christmas or two weeks before Easter? It would be very helpful to reserve this during the summer period. Just before these holidays, everyone suddenly wants a preventive maintenance, and sometimes this is a bit difficult for delivery deadlines. In the summer, production is on a short break. And ... afterwards starting again with new machines is even more enjoyable. At your factory or with us in Lummen? Inform us !

Kim Clijsters for the underprivileged

At the same time as the European elections in late May, in our province a fun event was organized for the underprivileged children in the region: A duck race organized by Lions. More than 80,000 ducks were sold and launched together. Prefamac also supported the action. The winning duck was good for a beautiful Mercedes. The duckling action brought more than € 400.000 to charity. Kim Clijsters, our Belgian tennis prodigy until recently, even had a special Kim duckling designed. A collector's item for tennis lovers! And rest assured, all the ducks were neatly fished out of the water on arrival.

Click on more photos where you can discover maaaaaany ducklings.
