Dear reader,

We proudly like to announce our new website. It has taken a while before everything was ready, it was then launched with old photos, but the final result is very nice: very easy and accessible for everyone, lots of photos and videos. Please feel free to take your time by scrolling through the new site, and let us know what you are missing. A lot of pleasure with our new website www.prefamac.com!

Newsletter 65 : our new website is ready !

14/10/2014

Simple look

No vibrant colours or busy images on our new site. Sober brown and beige tones, so that the information you are looking for immediately catches the eye. A survey of our customers taught us that you are all very busy people. You want to find information quickly, and with a simple unified structure. Furthermore you also want to look up our site with your PC, tablet, or mobile phone, ... in short, the website had to be responsive for all these methods. Under Prefamac we find a short presentation of our company, and our 100's export countries receive the necessary attention. We also show briefly the Awards that Prefamac could win in the past, and our memberships in various professional organizations and institutions. And ... all this in 9 languages.

Choose "more pictures", where we show with pride a world map on which our export countries are shown in green (how could it be otherwise :-))

HOME PREFAMAC ▾ INDUSTRIAL MACHINES ▾

INDUSTRIAL MACHINES

Cooling tunnels

POWER III

POWER SLIM

PQ

Industrial machines

The industrial machines can be found on the home page of www.prefamac.com, but you can also choose this category in the menu on the top of the page. When clicking on cooling tunnels, you will see a division between POWER III, POWER slim? POWER PLUS, LIGHT and LIGHT PLEXI.

Per type machine a uniform technical information is shown: many pictures, function of the machine, execution, electricity, options, dimensions and references. With a simple mouse click, you can also enquire for a quotation of the requested machine. Of course, we will ask some parameters here.

Choose "more pictures", where we will show you a complete image of our industrial machines.

- Automatic tempering machines
- Moulding machines
- Enrober belts
- Flaking machines
- Spinning machines
- Pneumatic scrapers
- Heating cabinets
- Melting trays
- Accessoires

Small-scale machines

For the small-scale machines there is a simple selection per type machine possible on the new site. For the moulding machines for example, you can choose for the compact, the compact 3in1, and the moulding machine 30 kg or 80 kg. Especially our many detailed photos and numerous videos will give you a lot of information.

Choose "more pictures", where we will show you a complete image of our small-scale machines.

[More pictures](#)

Chocolate moulds

The chocolate moulds on www.prefamac.com are divided into several categories to make it easy: design, bars & blocks, nuts & coffee, cocoa & origin,... Because we show a lot of photos, you get a very good picture of the mould with white, milk and dark chocolate. Or with decorations on it, in different colours and scents.

The price shown is the maximum price because

obviously for bigger quantities there are increasing quantity discounts. And tailor-made moulds, ... let's hear what you see like us to design !

Videos

Especially for small-scale machines it is useful to see how a flaking machine is filled with chocolate blocks, or how a chocolate mould is filled with chocolate, how a spinning machine turns and vibrates Pictures and videos say so much more than words. The videos are kept sufficiently short, so you do not really need a "heavy" computer to look up our videos.

Testimonials

And of course we have asked some happy customers to share their opinion. Are they satisfied with Prefamac or are they super happy (delighted customers:-)). Both large industrial customers who produce tons per hour and starting chocolatiers were asked to speak. Read them for sure!

It's really fun to get to know us in this way !

Choose more photos, where we will show you some smiling customers.
