Newsletter 68: An additional idea for Valentine?

10/02/2015

Dear reader,

Tailor-made melting kettles are very popular at Prefamac, and of course we also have standard models from 170 up to 5000L.

We will also verify if the typical "paper snipper" flakes cannot be produced in bigger quantities.

And for Valentine ... we quickly present another additional idea.

We wish you a lot of reading pleasure and enjoy the many "tasty" pictures this time !

Myriam Schepers
Managing Director

Standard and tailor-made melting kettles

Our standard melting kettles are 3 jacket, completely out of stainless steel and slightly pearled. 170, 240, 500, 1000, 2000, 3000 and 5000L content, so something for everyone. Standard with two covers, agitator with scrapers, digital and mechanical thermostat. To be combined with gear or lobe pumps in various capacities, flexible or fixed piping for shorter or longer constructions, ... it is all possible. And of course, the melting kettles also can be produced completely tailor-made: special measurement, electrical boxes on a central panel for various kettles together, on platforms with stairs and unloading places, ... We could show you a hundred pictures of everything that is possible. On our website www.prefamac.com you can already find quite a lot of information under "industrial machines - melting kettles".

In need of bigger quantities ?

In our previous newsletter, we presented you our various flaking machines. The

SNIPPER produces a sort of "paper shreds" in chocolate, but the application of this machine is rather small-scale. Are you perhaps looking for something comparable, but on a bigger scale? Then our PREMIUM flaking machine will be the best choice. A quantity of 5 kg can be flaked in only 2 minutes !!! And... this in a plurality for industrial applications. Here we show you an example of white chocolate, produced with the Premium flaking machine in combination with a special non-standard knife. Different knives can be obtained per machine and they can be switched easily.

Choose [more pictures](#) to see some examples with milk chocolate, but also the applications of the BASIC flaking machine with special blades.

Quickly something extra for Valentine ?

Are you looking for an "easy-to-buy" article for Valentine? Then use our flexible moulds! Pour some tempered chocolate in small lanes on the flexible, vibrate for a bit, put the sticks in, ... and then you can start decorating with lots of hearts! You will not only be surprised with the hearts, but also the back side has pretty flowers, stars, ... so that you will certainly score ! These flexible moulds can be used over and over again!!

Click on [more pictures](#) where we will show you how to use these "rewarding" flexible moulds all year. Or do you prefer hearts anyway???
