

Dear reader,  
2016 has just begun, but just maybe you are thinking already of 2017? We would like to suggest a few new investments, for both industrial and non-industrial manufacturers. And let's not forget ... first of all, a very happy 2016! We wish you a lot of looking and reading pleasure.

Myriam Schepers  
Managing Director

#### Additional plans for 2016 or 2017?

Oh yes, Prefamac also is thinking about 2017. In May of 2017 the famous INTERPACK fair will take place in Germany, and as usual, Prefamac will exhibit its innovations. On the picture here aside, you can see a double line. The cookies will be covered with white chocolate in the first enrober, or with a milk chocolate layer in the second one. The machines seem to have two floors. The conveyors in between make sure that the cookies are flipped at the right height, to avoid any mistakes. Or were you considering an additional enrober to enable supplementary production variety? A new cooling tunnel POWER, POWER SLIM or POWER PLUS? Or a smaller tunnel LIGHT with transparent covers for your demo room? A kettle with weight control or a manual tank station? Just let us know, we will guide you. Or for more ideas, just take a look on our website [www.prefamac.com](http://www.prefamac.com).

Click on [more photos](#), where we will show you some examples.

### Automatic tempering

Manual tempering with a moulding machine or even smaller with a compact or a compact 3 in 1 is still very popular. However, more and more customers consider automated machine. Prefamac can offer the Inspire 15 kg or the Continua 30 kg or 60 kg. The 101 possible colors of the Inspire are very cool, on the contrary the price of the Continua 60 convinces a lot of customers to choose this larger machine. And the tempering quality ... with all 3 machines undoubtedly fantastic. All models are available with enrober belt for truffles or pralines.

By clicking on [more photos](#) you can choose yourselves, but we also would like to show the 3 in 1 in comparison.

### Happy 2016 !

Did you also receive so many or maybe too many emails at the year's end? We didn't want to bother you in sending a separate newsletter. However, our wishes are nevertheless not any less: heaps of success, love, warmth, and joy in this coming year!
