

Dear reader,

Summer holidays are nearly over at Prefamac... so on to the busy schedule for the end of 2016 and already 2017. Preparations for Interpack 2017 have already begun. Machines, moulds, We even have two graduates bachelors put to work. Much looking and reading pleasure!

A visit is recommended!

In the coming months, we have (again) very unique biscuit and chocolate machines in production: very long and very wide POWER cooling tunnels, SWITCH ULTRA enrober machines with special executions, kettles-pumps-piping in specific custom work, In short, worthwhile! Even our Minister of Employment, Economy & Innovation comes to visit to see how Prefamac succeeds in achieving 98% export, and this in more than 100 countries. Will you also come and take a look? Send us a email on info@prefamac.com to give a date for your choice. We will already set out the tea and coffee :-).

Click on [more photos](#), where we show some examples of industrial customization. On www.prefamac.com you can also find our smaller machines and chocolate moulds.

In need of new models?

Is your range for the winter already created? Do you need some new chocolates. Prefamac is highly specialized in custom design of chocolates, tablets, hearts, flowers, animals, logos, Type 1000, 2000, 3000, or other dimensions, tailored to your existing machinery.

At [more photos](#) are some of our standard moulds. In the coming months there will be some new designs.

Heating cabinets for big and small

Really any company can use it:

- to preheat chocolate moulds and to obtain a more shiny result.
- to keep enrober belts or distribution trays warm at night
- to melt chocolate
- to preheat chocolate blocks (with biblio system).
- as work table (to place a compact or melting tray on).

- in production or in the lab

At [more photos](#) we show both the single and double cabinet. The biblio heating cabinet is to preheat chocolate blocks in order to obtain the finest possible flakes with our various flaking machines. Also of this an image as "hot chocolate milk flakes" will be a hype this winter.

Two Bachelors Economics

After reading the foregoing news, it is probably clear that we have a lot of work. Therefore, we have searched for some reinforcement at Prefamac with Laurean and Luna. Both are just graduated with a Bachelor of Economics and also have a decent knowledge of languages. Congratulations Luna and Laurean! We are very happy with their extra help and wish both girls good luck.
