**Newsletter 89: Come visit us this year !**

Do you already think of 2019 and new, more flexible, faster and more ergonomic machines on your schedule? Then you have to be at Prefamac this or next month ... we have a wonderful total project under construction. We are going to make the necessary time for you ... Because it was so busy last summer that we almost forgot our holiday and our 30th birthday. But .... the invitation will follow shortly. You can already take a look at our new 'very practical' building. During the award ceremony of Corporate Social Responsibility, Prefamac was already put in the flowers. Lots of reading pleasure and within a few weeks !!

**Visit us in November or December!!**

This year we had a wonderful summer in Europe, the Indian Summer also continues! At Prefamac we are already planning for the second half of 2019, and currently we have a very nice project to see (see photo here above). The machines run above and between other production lines, so a top example of flexibility and customization. You can dream of melting, cooling, tempering, and also of full option coating or enrobing with very delicious chocolate. Our enrobing machines are available from 400, 500, 620, 820, .... 1200, 1300, 1400, 1500 to 1600 mm width. With removable bottom trays, with removable bottom baths, with lick and / or tilt rollers, with special decorations, with one or more levels, .... You cannot think of it that way, everything is possible. The machines can be used in a multifunctional way for various biscuits, bars and praline applications.

#### A delicious cup of coffee

Are we already thinking about a heavenly winter praline to be eaten alongside a delicious cup of coffee, or maybe just a small bar of chocolate? Absolutely! **Enclosed** : we show you just a few examples: large and small, round and oval...and you can't go wrong with a set. Our moulds can be purchased individually, so there's absolutely no obligation to purchase in large quantities. We have everything in stock and the order process is quick and easy. Or maybe you'd prefer a cup of hot chocolate, prepared with home-made chocolate flakes. The PREMIUM flaking machine flakes 5 kg chocolate blocks in less than two minutes, turning them into small, rapidly-melting flakes. Sooooo scrumptious and it goes perfectly with cocooning for winter evenings.

### Hip, hip, hooray! Prefamac turned 30!

Prefamac Chocolate Machines turned 30. Too busy to party in September and October, but you will all receive an invitation to celebrate our anniversary. We've already moved into the new building, and it is super, super fantastic! We've already thrown an initial party to test everything out: the presentation of the corporate social responsibility awards at the international level. Sustainable and high-performing entrepreneurship with an eye for the environment, for the fellow man, .... Prefamac also won, with a very high score. We had a great time celebrating that achievement.

Over at [more photos](#) you can catch a sneak peek of our new building. Beautiful, right?
