Newsletter 91: Up and down ... it's all possible!

2019 will be a top year for innovations at Prefamac. In this newsletter we will briefly reflect on the sloping cooling tunnels that can be fitted into everyone's company. We also zoom in briefly on the renewed 28 cm enrober belts. The Deee-LUX version on every terrain! And yes for Valentine we can help you with the necessary chocolate moulds.

We wish you a lot reading and watching pleasure.

Myriam Schepers
Managing Director

Sloping cooling tunnels

This is a great example of super custom work. Several production lines were located on the ground floor of the customer concerned. COMPLETELY ON THE TOP, the new PREFAMAC line was installed: Power cooling tunnel upwards, a curve of 90°, a straight belt, again a curve of 90°, an entrance grille, a Switch Ultra enrober, a continuous tempering machine and back a Power cooling tunnel downwards. Full option and PLC controlled with lick rollers, rotation cylinder, pressure grille, various chocolate distribution trays, removable chocolate trays and removable bottom baths, hinged entry and exit, 1050 mm wide and suitable **for more than 40 different cookies!** Never too difficult for Prefamac. Everything is possible. And what are your plans that you would like to discuss with us? We would love to hear it.

With [more photos](#) you can find some details of this line from various angles. Our new LIGHT cooling tunnel is also shown. You can also look up other machines on our website www.prefamac.com.

Let's meet in Ecuador, Peru or Mexico?

Nothing is more important than a personal contact. During “business” trade fairs no one has time for a thorough discussion. Therefore Prefamac undertakes each year a trip to various areas which shows high potential. The Belgian royal family also does this, together with its Ministers of Foreign Trade and Economy, and a large delegation of business leaders. The first trip for HRH Princess Astrid will be to Mexico, and here I will accompany the group. But before that, I will travel to Ecuador and Peru first, to be able to have a direct conversation with customers and potential customers.

- Meetings for **Ecuador** can be organized from 12th until 13th February 2019 in Quito: **Sheraton Quito Hotel**
- Meetings for **Peru** can be organized from 14th until 15th February 2019 in Lima: **Sheraton Lima Hotel**
- Meetings for **Mexico** can be organized from 18th until 21st February 2019 in :
 - 18th until 20th February in Mexico City: **Marquis Reforma Hotel or St. Regis Hotel**

- 21st February in Monterrey: **Quinta Real Hotel**

During a personal meeting you have the time to explain your plans and wishes, and together we can discuss everything in detail with the 30 years of experience I have in the meantime. Do not postpone your reservation, because my schedule is of course very limited in time.

You still have plenty of time to prepare all of your questions. This is possible until beginning of February 2019, but your appointment should be reserved **immediately** ! Just send us an email (info@prefamac.com) to confirm your interest.

The DLUX enrober belt 28 cm

The Prefamac enrober belts have always been a success, but we had 2 versions of 28 cm: one for the 80 kg moulding machine and one for the 60 kg automatic tempering machine. We have now combined those two into a super enrober belt with all possible options! We call it DLUX. Both the version with extension belt 28 cm and this with truffle top and truffle table 90 or 150 cm is available. We advise you to order quickly because our customers know that the quality of this modular machine is DeeeLUX at Prefamac.

With [more photos](#) you can find some examples.

Some quick moulds for Valentine

Say it with flowers for Valentine. A large or small tablet with flowers on it? Or a long bar? Or individual flowers? All lovers are crazy about it. Whether the flowers are coloured or not. Do you prefer real hearts to excite the passion of young and old? Small or big hearts? Dashes or sphere? We have them all in stock now just before Valentine.

With [more photos](#) we show the various heartbreakers, to let you decide quickly.
