Ready for the wedding bells?

Summer is known for its many parties, so the chocolate can also be tasted warm until the early hours. With fruit or ice cream ... all delicious. Speaking of ice ... this requires a double SWITCH ULTRA enrobing machine to get lots of chocolate around the ice. And what do we do on October 28 if it is national or international chocolate day? Finally, we show just how temptingly round shapes :- ) can be.

Myriam Schepers

### Rent your 3in1 compact machine

Weddings, First Communion, spring parties, BBQs, .... the period of the parties has begun again. Let the children dip their marshmallow or piece of banana in some chocolate is really fun and original! Therefore rent your 3 in 1 compact machine in the peak season! It brings you an extra penny on your days off or during your vacation period. We have a version with the 3 thermostats on the front (FRONT) or with the 3 thermostats on the rear (BACK). Chocolate with a colour, with a taste or nut, ... it is all possible without damaging the machine. Full cleaning after use is possible in a very short time. Prefamac has adapted heating cabinets to melt additional chocolate for those fast chocoholics. And there is also a 3in1 table on castors available to conveniently store the machine when the opening dance starts..

With [more photos](#) you can choose from colours from pink to green

### The double SWITCH ULTRA

To enrobe products or ice cream with a lot of chocolate, a double enrobing machine is needed: with 2 double chocolate curtains, 2 bottom baths, 2 vibrating units, 2 blowers, ... The machines are available in 400, 500, 620, 820 ... up to 1200, 1300, 1500 and 1600 mm. The 1800 and 2000 mm machines are purely customized. Options that can be added are filters, decoration, lick rollers, curtain trays for stripes, detailer, blower, ... and of course the extra chocolate tray and bottom bath. For each chocolate colour, there is its own chocolate tray and own bottom bath. And for those heavy bottom baths ... we have a separate rack for that at Prefamac. SWITCHing thus becomes very easy in this way!

With [more photos](#) you can see a few options (and a single machine). Or visit our website [www.prefamac.com](http://www.prefamac.com) where you can find the associated cooling tunnels, melting kettles, tempering machines, ...

## 28/10 International Chocolate Day

Is 28/10 going to be a national or an international chocolate day? Many countries have already established it, just as Halloween has entered the world. Do we choose a bear or a clown that day, or a dog or a house? With the single or double spinning machines from Prefamac you can respond very flexibly to this. The relatively small and light machines can be combined very flexibly. With the help of a warm-up tunnel and a cooling tunnel, the figures almost run off the conveyor themselves. Adjustable speed is provided as standard. A separate blower on both sides can be another option.

We show [more photos](#) for the chocoholics, or for visitors who want to get to know the LIGHT cooling tunnels. The Light of 40 or 50 cm belt width can also be produced with higher capacities, so that the production can be further increased.

### Round shapes

No ... we are not talking about women :-) nor about round pralines. Chocolate with round shapes !! That always looks super nice! Take for example the Bubble or Bubble bar, the BabblesR and BabblesW, bbbbbb ..... With the Wine horse and Fishes you are ready for the summer competitions. And with the Seahorse and Sea star, little Choco lovers immediately dive into the sea this summer.

With [more photos](#) even more glossy round shapes and of course our Heart1 shouldn't be forgotten!
